Begusarai, Bihar, India

EDUCATION

Bihar Engineering University (BEU)

Patna, Bihar

Bachelor of Technology in Computer Science; GPA: 7.5

Sept. 2023 – Aug. 2027

- Relevant Coursework: Network Security, Web Application Development, Data Structures, Algorithms, Database Management

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML5, CSS3, SQL

Cybersecurity Tools: Wireshark, Metasploit, Kali Linux, Nmap, Ettercap, Burp Suite, OWASP ZAP

Security Specializations: Network Security, Web Application Penetration Testing, OSINT, Digital Forensics, Vulnerability Assessment

Web Development: Full-Stack Development, React.js, Node.js, RESTful APIs, JSON, Responsive Design

Operating Systems: Linux (Kali, Ubuntu), Windows

Methodologies: Ethical Hacking, Incident Response, Security Awareness Training, OWASP Top 10

EXPERIENCE

Cybersecurity Student

Feb. 2025 – May 2025

The Drop Organization

Begusarai, Bihar, India

- Conducted penetration testing and vulnerability assessments on simulated networks using Wireshark, Nmap, and Metasploit, identifying and documenting 15+ critical security vulnerabilities
- Performed incident response drills and security audits, reducing potential threat response time by 40% through systematic analysis and documentation
- Developed and delivered security awareness training materials for 50+ participants, covering social engineering, phishing detection, and secure coding practices
- Executed web application security testing using OWASP methodologies and tools including Burp Suite, discovering and reporting SQL injection and XSS vulnerabilities

Cyber Security Workshop Participant

July 2024

DROP Organization

West Bengal, India

- Participated in intensive cybersecurity workshops focusing on network defense strategies, digital forensics techniques, and real-world threat analysis scenarios
- Collaborated with cross-functional teams to analyze network traffic patterns and identify anomalous behavior using Wireshark and Ettercap
- Gained hands-on experience with ethical hacking methodologies, including reconnaissance, scanning, exploitation, and post-exploitation techniques in controlled lab environments

PROJECTS

Network Security Monitoring System

Ongoing

Personal Project

- Designed and implemented a real-time network monitoring system using Python and Wireshark to detect suspicious traffic patterns and potential intrusions
- Integrated automated alert mechanisms for common attack vectors including port scans, DDoS attempts, and unauthorized access attempts
- Created comprehensive logging and reporting dashboard visualizing network security metrics and threat intelligence data

Web Application Security Scanner

Ongoing

Personal Project

- Developed a full-stack web application security scanner using JavaScript and Python to identify OWASP Top 10 vulnerabilities
- Implemented automated testing modules for SQL injection, XSS, CSRF, and security misconfigurations with detailed reporting features
- Built responsive front-end interface with React.js for managing scan configurations and visualizing vulnerability assessment results

CERTIFICATIONS & TRAINING

Ethical Hacking Training – DROP Organization (2024-2025): Completed comprehensive training in penetration testing, vulnerability assessment, and incident response

Network Security Fundamentals – Self-study through industry-standard resources and hands-on labs

Web Application Security – Practical experience with OWASP guidelines and secure coding practices

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native)

Interests: Bug Bounty Programs, CTF Competitions, Open-Source Security Contributions, Digital Privacy Advocacy

Professional Goals: Seeking cybersecurity internship opportunities to apply security knowledge in real-world environments and contribute to building secure, scalable systems
